- _____ M - Width of Neck at Nut
- _____ N - Width of Body at widest point of Top Bout
- _____ O - Width of Body at widest point of Lower Bout

MEASURING INSTRUCTIONS

STEP 1: Place the instrument on a table and rest the Body at the heel on a 1/2" block.

STEP 2: Take measurements to the nearest 1/16".

STEP 3: Make a tracing of the guitar body shape using a reasonable weight paper or light cardboard. Do not use newsprint if at all possible. **CUT OUT YOUR TRACING AND COMPARE IT TO THE BACK OF YOUR GUITAR.** It is important that this tracing is accurate so that we can obtain a good fit for your instrument.

STEP 4: Note anything unusual about your guitar. Does it have any external knobs, pickups, strap pins or anything else that will require special cutting of the padding? If so, please include the measurements for these items and note their exact placement on your plans (see example below.)

STEP 5: Is your guitar a cutaway? Please indicate whether you want the cutaway filled with padding or left open for extra storage.
