MEASURING INSTRUCTIONS

- STEP 1:** Place the instrument on a table.
- STEP 2:** Take measurements to the nearest 1/16".
- STEP 3:** Make a tracing of the guitar body shape using a reasonable weight paper or light cardboard. Do not use newsprint if at all possible. **CUT OUT YOUR TRACING AND COMPARE IT TO THE BACK OF YOUR GUITAR.** It is important that this tracing is accurate so that we can obtain a good fit for your instrument.
- STEP 4:** Note anything unusual about your guitar. Does it have any external knobs, pickups, strap pins or anything else that will require special cutting of the padding? If so, please include the measurements for these items and note their exact placement on your plans.
- STEP 5:** Place a straight edge on your guitar that is centred between the "D" and "G" strings and measure the distance "OFF CENTRE" the headstock and body are. (See drawing below.)

Measure the distance "off centre" from the centre line
