- _____ M - Width of Body at widest point of Lower Bout
- _____ N - Table top to Back of Violin at the Heel

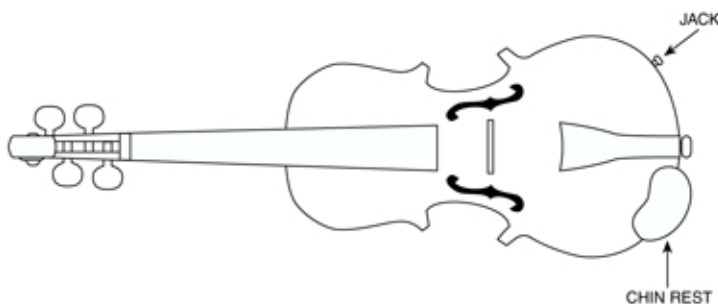

MEASURING INSTRUCTIONS

STEP 1: Place the instrument on a table and rest the Scroll on a 1/2" (12mm) block.

STEP 2: Take measurements to the nearest 1/16" (1mm)

STEP 3: Make a tracing of the violin body shape using a reasonable weight paper or light cardboard. Do not use newsprint if at all possible. **CUT OUT YOUR TRACING AND COMPARE IT TO THE BACK OF YOUR VIOLIN.** It is important that this tracing is accurate so that we can obtain a good fit for your instrument.

STEP 4: Note anything unusual about your violin. Does it have any external knobs, pickups, chin rests or anything else that will require special cutting of the padding? If so, please include the measurements for these items and note their exact placement on your plans.
